

YEMI MUBARAQAT ONIFADE

DATA SCIENCE | DATA ANALYTICS

Nigeria | +234 703 048 3377 | yemimubaraqat@gmail.com | LinkedIn: [linkedin.com/in/yemi-onifade](https://www.linkedin.com/in/yemi-onifade) | GitHub: github.com/Mubaraqat

Data Scientist with a background in Medical Laboratory Science and hands-on training in data science, analytics, and machine learning. Proficient in Python, SQL, Excel, Power BI, Pandas, NumPy, Matplotlib, and Scikit-learn, with experience in data cleaning, exploratory data analysis, data visualization, statistical analysis, and predictive modelling. Built end-to-end data science projects involving machine learning, model optimization, interactive dashboards, and data-driven insights. Strong analytical, problem-solving, research, and communication skills.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Excel

Data Analysis & Management: Data Cleaning, Data Preprocessing, Data Validation, Exploratory Data Analysis, Statistical Analysis, Reporting

Data Visualization: Power BI, Matplotlib, Plotly, Tableau

Machine Learning: Scikit-learn, Logistic Regression, Classification, Regression, Feature Engineering, Model Evaluation, Hyperparameter Tuning, SMOTE

Operational & Professional Skills: Quality Control, Data Validation, Documentation, Record Management, Reporting, Problem Solving, Team Collaboration

Tools: Jupyter Notebook, Streamlit, GitHub, Microsoft Office

PROJECTS

Diabetes Risk Prediction | Python, Pandas, Scikit-learn | GitHub

- Developed an end-to-end machine learning pipeline to predict diabetes risk from patient health records.
- Performed data cleaning, exploratory data analysis, feature scaling, model training, and evaluation.
- Built and evaluated Logistic Regression models; applied StandardScaler, SMOTE, and GridSearchCV for preprocessing, imbalance handling, and optimization.
- Evaluated model performance using accuracy, precision, recall, F1-score, and classification reports.

SanTrack – Sanitation Tracking Platform | Python, Streamlit, Pandas, Plotly

- Developed the web-based dashboard for the SanTrack sanitation tracking application using Python and Streamlit.
- Analyzed sanitation data using Python and Pandas to identify trends and generate meaningful insights.
- Designed interactive data visualizations using Plotly to communicate sanitation trends and patterns.
- Integrated data analysis and visualizations into an interactive dashboard to support data-driven decision-making.

EXPERIENCE

Medical Laboratory Scientist Intern / Chief Intern | Lagos University Teaching Hospital (LUTH), Lagos | 2024–2025

- Managed and documented operational information while supporting accurate data recording across clinical departments.
- Applied quality-control procedures to maintain accuracy, reliability, and consistency of records and results.
- Coordinated intern schedules across multiple departments and organized professional development activities.
- Collaborated with multidisciplinary teams and communicated operational information clearly to interns and hospital management.

Laboratory Intern – CENTRAL-NTDs (ANDI) | Lagos University Teaching Hospital, Lagos | Research Experience

- Managed documentation and quality-control records for 1,700+ malaria slides and dried blood spot samples from multiple states.
- Used Excel to maintain, update, organize, validate, and analyze laboratory records.
- Applied spreadsheet formulas and functions to support data management and record accuracy.
- Monitored records for inconsistencies and supported quality-control and reporting activities.

Undergraduate Research Project | University of Ibadan | Research Project

- Investigated parasitic contamination of fresh fruits retailed at major markets in Ibadan.
- Contributed to data collection, laboratory analysis, interpretation, and scientific reporting.
- Co-authored a peer-reviewed publication in the African Journal of Clinical and Experimental Microbiology.

EDUCATION

Bachelor of Medical Laboratory Science (B.MLS) | University of Ibadan, College of Medicine, Nigeria | 2017–2024

DATA SCIENCE TRAINING

Data Science & Engineering Fellowship | Tech4Dev – Women Techsters Fellowship | 2025–2026

- Excel, Python, SQL, data analysis, data visualization, machine learning, Power BI, data preprocessing, exploratory data analysis, statistical analysis, and dashboard development.

CERTIFICATIONS

- Foundations of Data Science — Google, 2026
- Get Started with Python — Google, 2026
- Go Beyond the Numbers: Translate Data into Insights — Google, 2026
- The Power of Statistics — Google, 2026
- Regression Analysis — Google, 2026
- Data Science: Python for Data Analysis Full Bootcamp — Udemy, 2026
- Excel Basics for Data Analysis — IBM, 2024

PUBLICATION

Makanjuola, O. B., **Onifade, Y. M.**, & Dada-Adegbola, H. O. (2025). Factors associated with parasitic contamination of fresh fruits retailed at major markets in Ibadan, Nigeria: A public health concern. *African Journal of Clinical and Experimental Microbiology*, 26(4), 341–351.
